PROFILE

AI Transformation Specialist with three years of Big Four consulting experience at KPMG, working across AI strategy, Data & AI governance, transformation, change and adoption. Experienced in translating emerging technology into governance, roadmaps, management decisions and new ways of working, with strong stakeholder and executive exposure.

KPMG | SEP 2023 - PRESENT

AI Governance & Transformation

- Played a leading role in AI strategy and governance for a Flemish public-sector infrastructure organisation: helped establish the AI working group, shaped roles and decision rights, assessed 10 AI use cases, developed the roadmap and supported change and resource-planning discussions.

Data Quality, Governance & Change Adoption

- Led key parts of a banking Data Quality transformation with a focus on business analysis, change, adoption and management reporting. Helped translate ~300 issues into business priorities; 40 were prioritised with ~EUR 11M estimated combined impact across those 40 only.

Data & Architecture / Analytics Enablement

- Supported data modelling and architecture work in the public sector and user enablement in higher education, building the technical foundation to work effectively between business and delivery teams.

CSRD Reporting Transformation

- Led a multi-entity reporting workstream across 31 entities and 100+ stakeholders; coordinated governance, data collection and audit readiness. The 100-page report covered all 12 ESRS, was delivered on time and successfully completed audit.

CURRENT FOCUS

AI transformation in European financial-market infrastructure

Currently contributing to AI transformation with increasing responsibility for AI workstream leadership.

CORE STRENGTHS

- AI transformation & governance
