SUMMARY

Consultant at KPMG Advisory with 3 years of experience delivering Data & AI strategy, regulatory transformation and large-scale change for banking, public-sector and global logistics clients. Led an 11-person CSRD reporting workstream across 30+ countries through external limited assurance, and developed an AI strategy approved by a Flemish public organisation's Managing Director. Change & Adoption Specialist in KPMG Advisory's AI programme (AIDA), working with the Head of Advisory. Fluent in Dutch, French, English and Arabic.

EXPERIENCE

KPMG Advisory – Lighthouse **Brussels, Belgium**

Consultant, Data & AI Transformation ***Sep 2023 – Present***

Global Postal & Logistics | CSRD Reporting Transformation

- Led the sustainability-reporting workstream (team of 11, 12 months) across 31 entities in 30+ countries and 100+ stakeholders; delivered a ~200-page report that passed external limited assurance, using standardised templates and audit-evidence processes.
- Co-built a CSRD reporting application with the client's local IT team, linking ESRS requirements to reporting datapoints and supporting reporting across all datapoints in 30+ countries.

Belgian Bank (ECB/NBB-supervised) | Data Quality, Governance & Regulatory Transformation

- Prioritised 40 of ~300 Data Quality issues (~€11M estimated annualised impact, simulated from employee time savings and avoided regulatory fines) using an 80/20 approach; designed governance councils, accountability structures and a Jira-based issue process; approximately half of the prioritised issues resolved.
- Led change & adoption, roles-and-responsibilities training and process/workflow design within a core team of 7 across 8 data domains over 8 months (ongoing), implementing BCBS 239 / RDARR expectations.
- Trained 90 Data Owners, Stewards and Custodians, operationalised Collibra governance workflows and reported Data Quality KPIs monthly to the Data Board and Audit Committee.

Flemish Public Organisation (~1,200 employees) | AI Strategy, Governance & Transformation

- Developed the AI strategy and Target Operating Model (team of 8, 12 months), translating EU AI Act requirements into governance, decision rights and a 2-year roadmap; approved by the Managing Director with budget secured.
- Assessed and prioritised 10 AI use cases on value, feasibility, risk and readiness; chaired and now facilitate the 12-person cross-functional AI working group across management, business and IT.
- Designed and now rolling out a four-part mandatory AI learning programme covering AI fundamentals, AI fluency, Copilot and Copilot Studio for ~300 office-based employees.

Additional Data & Analytics Experience

- **Flemish Social Services Agency:** defined requirements and target data model for a Databricks platform transition; enabled 13 core-team users on Power BI over 6 months.
- **Belgian Higher-Education Institution:** designed role-based analytics navigation for 20 reports and challenged KPI definitions, report logic and visual design.

EDUCATION

KU Leuven **Brussels, Belgium**

Master of Science in Business Administration ***Sep 2022 – Jul 2023***

Major: Data & Information Management | Graduated with distinction

Thesis: Market reaction to production flaw announcements using an event study
